

TechNova Internship - Task 1 Sales Data Analysis Report

Author: MISWAN

Introduction

This report presents a sales data analysis of the Sample Superstore dataset. The goal was to evaluate sales performance, profitability, regional performance, and product performance using Python and data visualization techniques.

Dataset Overview

The dataset contains 9,994 records and 21 attributes including orders, customers, products, categories, regions, sales, discounts, and profit.

Key KPIs

Total Revenue: \$2,297,200.86

Total Profit: \$286,397.02

Category Analysis

Technology generated the highest sales (\$836,154.03), followed by Furniture (\$741,999.80) and Office Supplies (\$719,047.03).

Regional Analysis

The West region recorded the highest sales (\$725,457.82), followed by East, Central, and South.

Product Analysis

Canon imageCLASS 2200 Advanced Copier was the top-performing product with sales of \$61,599.82.

Visualizations

The project includes Sales by Category, Profit by Category, Sales by Region, Top Products, and Monthly Sales Trend charts.

Business Insights

Technology is the strongest category. The West region drives the largest share of revenue. A small group of products contributes significantly to overall business performance.

Conclusion

The analysis demonstrates strong business performance with more than \$2.29 million in revenue and highlights opportunities for targeted marketing, inventory optimization, and regional growth.

strategies.
